Dear Yvonne

Re: Guest lecture for students in the Bachelor of Education (Early Childhood) program at QUT Caboolture.

Thank you so much for another splendid guest lecture on the Montessori approach to education for first and second year students in the Bachelor of Education (Early Childhood) program. Once again, your presentation and skilled delivery were well targeted for this audience and the students were completely engaged. This was evident in their concentration during the lecture and the thoughtful questions and reflections upon conclusion.

From my perspective, your lecture also made visible and reinforced many important principles and practices in any quality early childhood education and care program, prior to school and in school. You will be pleased to know that in today's workshop, the students continued to refer back to points made by you in your lecture. I also understand some will be quoting you!

Please find enclosed a token of our appreciation for your time and effort – away from your school.

I look forward to future opportunities to work together.

Yours sincerely
